### ***NOT to Participate as an “In-network” Provider:***

Insurance companies limit provider decision-making and impact the quality of care you receive. To stay within carrier contracts, we would be required to reduce the quality of care offered to our patients, which we are **unwilling to do**. We will not compromise the quality of services we offer in order to stay 'in network' with insurance companies; participating as an out of network provider allows us to maintain autonomy and improve the quality of care our patients expect and are accustomed to - and deserve. ***We believe your treatment decisions should remain between you and your physician, not a bureaucratic entity that does not understand the need for quality, advanced, expert care.***

Please remember, each patients' insurance policy is different. We could have Patient A with MetLife and Patient B with MetLife, and reimbursement on their claims may be totally different. Insurance Companies have thousands of policies – all with different benefits and a multitude of disclaimers. Just like you should be your own patient advocate, you should also be your own advocate with your insurance company.
